---

RESEARCH INTERESTS

Language-Vision joint understanding via storytelling; cross modal generation and retrieval and multi-modal story comprehension; Deep Learning, Computer Vision and Natural Language Processing.

EDUCATION

Doctor of Philosophy (2016-Present)
Computer Science
Rutgers - The State University of New Jersey
GPA: 3.66/4

Bachelor of Engineering (2009-2013)
Instrumentation and Control Engineering
Anna University, Chennai, India
CGPA: 8.19/10

RESEARCH EXPERIENCE

Computer Vision Research Intern, Adobe Research (May, 2020 - Nov, 2020)
Adviser(s): Dr. Kushal Kafle, Dr. Scott Cohen, Dr. Jonathan Brandt, Adobe Research
Summary: We develop a novel visual storytelling dataset made of text and illustrations co-created from scratch. We are currently developing deep neural networks that model context, coherence, creativity and causality to complete a partly given multimodal story.

Lead of DARPA SocialSim Project (Jan 2018 - June 2019)
Adviser(s): Dr.Mubbasir Kapadia and Dr. Gerard De Melo, Rutgers University
Lead a team of 3 PhD and 4 MS students for a DARPA funded project. Its a series of challenges related to simulation of information flow within and across multiple social networks. Large amounts of data of events made in social networks, associated users and their profile were given. Graph based node representation learning and multi-task recurrent architectures formed the basis of techniques used to solve associated problems.

Associate Intern, Disney Research (Jun, 2017 - Sep, 2017)
Adviser(s): Dr. Mubbasir Kapadia, Disney Research
Summary: We proposed a hierarchical recurrent architecture optimized over sequential order embedding loss function for story illustration task. The performance was evaluated quantitatively and qualitatively and the results are published in IEEE CVPR 2018.

Research Associate, IIIT-Delhi (Nov, 2013 - June 2016)
Adviser(s): Dr. A.V.Subramanyam, Assistant Professor, IIITD
Summary: Focus was on forgery detection in images and videos based on feature extraction from noise (caused by the camera sensor or compression). Machine Learning models were trained to detect anomalies caused by operations such as filtering or inpainting. The position also involved being an active member of CERC and was funded by *Department of Electronics and Information TechnologY (DeitY), Govt of India* and *Cybersecurity Education and Research Centre (CERC@IIITD).*

TEACHING EXPERIENCE

Teaching Assistant

Probability and Statistics	(Fall 2016)
Principles of Programming Languages	(Spring 2017)
Topics in AI: Data StoryTelling	(Fall 2017)

PROFESSIONAL EXPERIENCE

Conference Reviewing

NAACL - Program Committee	(2021)
EMNLP - Emergency Reviewer	(2020)
ICDM - Reviewer	(2020)

SKILL SET

Programming	:	Python, MATLAB, C++, C, SQL
Deep Learning Frameworks	:	PyTorch, Keras, Tensorflow
Scientific Computing Packages	:	Scikit-learn, Numpy, Scipy
Tools and Libraries	:	OpenCV, libSVM, Git, LATEX, MTURK
